

City Inn, Leeds

Hotel Complex

Changing the face of leisure in Leeds.

The recently completed City Inn Leeds has set new standards for hotels in the city and added to SCS Group's enviable track record in the leisure sector.

At the heart of the newly built Granary Wharf district, this new boutique hotel has all the hallmarks of a contemporary City Inn development. Designed to offer guests the highest possible standards of quality, the building boasts high-speed Wi-Fi, iMac computers and Sky in all 333 rooms.

SCS Group's proven attention to detail, consistency and expertise in modern internal finishes enabled the team to install both partitioning and suspended ceilings throughout the development. In addition to creating an impressive lobby, SCS were also able to conceal the hotel's advanced lighting system and enhanced air conditioning.

The appointment of SCS on the City Inn Leeds project follows the group's high profile work at the City of Leeds Museum and at Doncaster Racecourse.
