

# Droylsden Academy

## Educational

The SCS Group were engaged to form a key part of the delivery team, with responsibility for the installation of partitions, ceilings and associated works.

Our management and installation team also had to overcome the key challenge of designing and installing an intricate detail formed using curved timber fins. We managed this successfully, and they were clad with metal and Glasroc boards to form a folding plate.

The building is composed of three elements - the arcing open plan 11-16 area, a rectilinear block containing sport, sixth form and community facilities, and a central hub containing learning resource, dining, social and performance areas.

The Droylsden Academy building footprint is approximately 10,748 sq metres and is accommodated over two and three storeys.

The construction of a new school has huge potential benefits for both educational interest and the potential for inspiring young people into a future in the construction industry.

### The Result

The SCS Groups experience and expertise formed an integral part in the Construction of the Droylsden Academy Project, built to accommodate 1400 11-19 year olds.

SCS installed innovative and market leading products to develop a dynamic learning environment. The building will serve as a beacon to the local community. The finish of the Academy encourages a sense of awe, serving as a dynamic symbol for learning in the 21<sup>st</sup> century.

**Main Contractor:** Carillion

**Architect:** Ryder

**Client:** Tameside

**SCS Contract Scope:** Partitions, Plastering, GRG Mouldings, Acoustic Baffles and Suspended Ceilings

**Contract Date:** February 11 – August 11

**SCS Contract Value:** £1,510,000

**SCS Project Team:**

**Nick McDowell – Project Manager**  
**Darren Friend – Commercial Director**  
**Callum Dinsdale – Estimating Surveyor**
