

Endike School, Hull

Education

The SCS Group have recently completed works on the Endike Primary School, part of the Hull BSF programme. The £6.7million project will provide 300 pupils with first rate facilities that will benefit current and future pupils for generations to come.

As well as the 1.5 form entry school, the building will form a community hub incorporating a public library, café and multi-agency space. The project design adopts a clear rectangular form, stepping up from one floor up to three floors at the main front façade and public plaza. The evocative school and area name, 'Endike' is the springing point for the buildings iconography, with the word's letters dynamically placed over the entire surface of the building in painted insulated render and cladding.

SCS completed SFS framing on the new build school, with added complexity that each elevation was to give the appearance of being made up of the letters making up the school's name. SCS then completed the facade in insulated render, which in turn was painted to identify the separate letters. SCS also completed cladding to the underside of the semi external walkway. The scheme was completed with installation of the dry lining partitions.

Main Contractor: Sewell

Architect: Space

Client: Hull City Council

SCS Contract Scope: -

SFS, Cladding, External Render, Drylining, Partitions

Contract Date: 2012

SCS Contract Value: £785,000
