

Liverpool to Leeds... and Back

On the 22nd July 2020 (Hopefully if COVID-19 restrictions allow...) the Directors of SCS Building Solutions will be jumping onto their push bikes and riding from our Strand Street project in Liverpool to our Mustard Wharf project in Leeds. A total of 127 miles over a 3 day period along the Leeds to Liverpool Canal.

In the same week, all SCS staff will each be completing a minimum of 3 miles each on an exercise bike in our Head Office, which will see the return leg completed back from Leeds to Liverpool.

We are doing this to raise money for our friend and colleague Kate Oselton who is currently battling with terminal cancer. Kate has been part of the SCS family since 2007 and we want to do whatever we can to ensure she spends as much time with Ian, Grace and young Max whilst she can.

We aim to raise £10,000 for Kate and her family, and you can help us do this.

Please visit justgiving.com/crowdfunding/scsbuidingsolutions and donate as much as you can.

Thank you in advance for all your support, Craig, Darren, Michelle, Nick, Paul and all staff at SCS.
