

In keeping with the United Learning Trust's bold vision for education, this was a futuristic development that set new standards for schools and colleges in the Barnsley area. To fulfil the ambitious designs, our specialist teams, employed high - tech Metsec SFS systems and advanced drylining solutions. We also air sealed the building during installation to increase energy efficiency, reduce external noise and improve indoor air quality.

The Result

Today, Barnsley Academy offers a state-of-the-art learning environment for 1150 pupils, which reflects the school's specialism in science. The SCS Group's insistence on the latest materials and innovative designs helped create a sustainable and iconic building that continues to appeal to students, parents and teachers. Our versatile and highly adaptable interior solutions also allow the Academy to meet the diverse needs of the surrounding community.

Main Contractor:

Bowmer & Kirkland
