

# Birmingham Airport

Birmingham

Opened after only 14 months, the International Pier combines futuristic architecture and high-tech materials, and sits seamlessly alongside the rest of the airport's bright modern interior. This unique £50 million gateway replaces the existing structure and provides a state-of-the-art extension, which makes it possible for even the largest airliners to land in the Midlands. Once fully operational, this landmark facility will service up to 13 airlines at any one time and enable the airport to increase passenger numbers to 18 million.

## The Result

Over the 14 month period, SCS specialists were instrumental in the construction of the optimised steel frame. This was complimented by a versatile grid of expertly installed SAS Systems and Plasterboard Ceilings.

## Main Contractor:

Laing O'Rourke

## Architect:

Pascall Watson

## Client:

BIA

## SCS Contract Scope:

SAS Metal Ceiling System – 130, 150, 330 & Trucell. MF System.

## Contract Date:

January 2009 – November 2009

## SCS Contract Value:

£486,000

## SCS Project Leader:

Mark Jones
