

Bridgewater Place

Leeds largest office and living complex

As Leeds' tallest building, Bridgewater Place set a precedent for office and living space in the city centre. As a key member of the delivery team, the SCS Group was responsible for installing over 23,000m² of ceilings over 32 floors and maintaining a sleek, modern finish throughout. The project also required specialist knowledge of both metal and plaster ceilings and the ability to work to the highest possible standard.

The Result

Through the use of strong, lightweight aluminium our team of specialists was able to frame the exterior of the building with a series of striking canopies, which allowed natural light to flood in and perfectly matched the spacious modern interior. This was complemented by a versatile grid of expertly installed SAS System 150 metal ceilings, and plasterboard bulkheads on each floor.

Main Contractor:

Bovis Lend lease

Architect:

Aedas
