

D Campus

Sheffields media centre

Sheffield's 'new media' businesses are growing faster than in any other UK city. The landmark Digital Campus, was designed to bring 5,000 of the city's creative and digital professionals together and create a state-of-the-art industry hub. SCS Group were hand-picked to create a solution that would underline the modern design of the development and fulfill the project's pressing cost and timescale requirements.

The Result

Thanks to an extensive pre-installation survey, SCS were able to accurately specify, order and co-ordinate the manufacture of Metsec SFS steel frames off-site – reducing waste and disruption, minimising delays, and delivering on time and on budget. Our experienced installers were also instrumental in giving the D-Campus a modern, minimal interior that continues to inspire businesses and enhance the creative process.
