

# Frenchgate Centre

Doncaster

The Frenchgate 'Interchange' Doncaster was the first development in the country to combine a public transport hub and a retail shopping environment under one roof, and as such posed unique challenges. The SCS team was subsequently tasked with creating a space that was at once exciting to customers and practical, and solutions that were sympathetic to Doncaster's heritage, yet forward looking.

## The Result

The SCS Group's integrated approach to project management and multi-discipline expertise allowed us to seamlessly co-ordinate a number of different services and contractors. In addition to overseeing the design, manufacture and installation of the centre's 21st century interiors, we were also able to advise upon and install the very latest fire protection, acoustic paneling and thermal insulation.

## Main Contractor:
